## ENJOY your vehicle carefree?

With the BAIV "Vehicle Event SERVICE" You can!

This service includes a pick-up, maintenance, and home delivery service for your historic military vehicles ranging from para-bicycles to tanks & everything in between.

### This service means:

- We pick up your vehicle for several weeks in advance (depending on our work schedule and your request or the challenges set by you) before the ride & event neatly at your home. Of course we have made special arrangements with a reputable logistics partner.
- We will have an entry vehicle inspection in our very well equipped workshop and discuss with you **in advance** what we're going to fix, repair and service and what the estimated costs are.
- We make sure that everything is tip-top serviced and refuel your vehicle. Before vehicle delivery, our workshop manager provides a superior final inspection report which you will receive fully completed.
- We will transport your vehicle neatly back to you. If required, we even provide transportation to your specified location or event elsewhere in Europe.

### BAIV BV, Your specialist in:
